CAREER OBJECTIVE

Aspiring Data Engineer and AI Developer with expertise in Python, machine learning, and full-stack development, with hands-on experience in building and deploying data-driven applications. Passionate about designing scalable data pipelines, developing intelligent models, and delivering efficient, production-ready solutions that solve real-world challenges.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science (AI & ML)

2022 – 2026

Malla Reddy University, Hyderabad

CGPA: 8.60

SKILLS

Programming Languages: Python, Java, SQL

Data Engineering: ETL Concepts, Data Processing, Data Cleaning

AI & Machine Learning: Machine Learning, Deep Learning, NLP, Transformers

Libraries: Pandas, NumPy, Scikit-learn

Frameworks & Tools: Flask, React, Git, GitHub

Data Visualization: Power BI, Tableau, Excel

PROJECTS

Automatic Headline Generator

Mar 2024 [GitHub](#)

- Generating news headlines manually is time-consuming for large datasets.
- Developed an NLP-based Automatic Headline Generator using T5 Transformer and Flask for real-time headline prediction.
- Used Python, NLP, T5 Transformer, Flask, and Hugging Face Transformers for model development and deployment.
- Built an automated text summarization and headline generation system.

Image Caption Generator

Nov 2024 [GitHub](#)

- Generating meaningful captions for images requires complex visual and language understanding.
- Developed an Image Caption Generator using Vision Transformer (ViT) and NLP techniques for caption generation.
- Used Python, ViT, NLP, Flask, and TensorFlow/PyTorch for deep learning model implementation.
- Built a system capable of generating context-aware image captions automatically.

Campus Navigation Using Agentic AI

May 2026 [GitHub](#)

- Traditional campus navigation methods are confusing and inefficient for large universities.
- Developed an AI-powered navigation system using Agentic AI, NLP, and pathfinding algorithms for smart route guidance.
- Used Python, React.js, Flask, NLP, Dijkstra Algorithm, and A* Search Algorithm for system development.
- Improved indoor navigation efficiency with real-time route planning and navigation assistance.

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte (2024)
- Introduction to Data Science – Cisco (2023)
- Develop Gen AI Applications with Gemini and Streamlit – Google Cloud (2024)
